Subject: This ruling is appalling!!

Big business wins again!

So this is how the Bush administration and the DOJ is going to handle this? Those crooks at Microsoft have been monopolizing an entire industry for years and FINALLY when they get hauled into federal court and FOUND GUILTY, after millions of dollars spent on the case, they have to pay practically no price at all of their actions! As I said. Appalling!!

BIG MONEY WINS AGAIN!!!

Microsoft's licensing practices alone make it certain that no other operating system will ever stand a chance in making inroads on the desktops of America. Microsoft will not stand for just a piece of the pie.....THEY WANT THE WHOLE DAMN THING!!

When the security of the entire nation is at risk (well heck.....it is now) due to viruses and the Microsoft monopoly, I hope the Bush administration and the DOJ will stand up and take FULL RESPONSIBILITY for this atrocity!

P.S. No more votes for the people who put you in office!!
